1 Introduction

This is an example report text in LaTeX for the course Språkstatistik HT97. The purpose of this text is to demonstrate the use of LaTeX. A LaTeX file is a little bit like a HTML file. It contains text processing commands. If you want to view it you have to convert it first to a postscript file with the commands:

```
latex report2.tex
dvips -o report2.ps report2
```

After that you can view the file with "ghostview report2.ps" and print it with "lph327 report2.ps".

1.1 Some extra LaTeX information

Creating lists:

1. this is item 1 and
2. this is item 2

The three Swedish vowels must be created with the sequences ä, ö and å.

More information about LaTeX can be found in the book [Lam85] and later work about LaTeX. The book can be found on the bookshelf in H327.
